

PIA FDM Observations Based A-320 Training						
Date:						
Trainee Name:		P-Number:				
➤ Long Flare Distance	An aircraft which lands considerably after the threshold can overrun a runway. <table border="1"> <tr> <td>Amber</td> <td>2970 ft</td> </tr> <tr> <td>Red</td> <td>3465 ft</td> </tr> </table>		Amber	2970 ft	Red	3465 ft
Amber	2970 ft					
Red	3465 ft					
➤ Speed Low at Touch Down	A low airspeed at landing may result in a heavy, or short landing, or a tail strike due to the high pitch attitude at low speed. <table border="1"> <tr> <td>Amber</td> <td>VLS -8</td> </tr> <tr> <td>Red</td> <td>VLS-10</td> </tr> </table>		Amber	VLS -8	Red	VLS-10
Amber	VLS -8					
Red	VLS-10
